Thumper #24

AHR Number: 16132Close Date: 1-24-17Room: A486B**NHEERL Animal Health Report**

Number: 16132

Date Found: 09/12/16

Time Found: 8:00am

Found by: [REDACTED]

Room: A486B

Investigator: [REDACTED]

LAPR#: 09-03-002

Species/Strain: Rabbit/NZW

Sex: male

DOB: 02/05/08

Date Received: 09/06/09

Animal ID/Cage: 24 *Thumper*

Dull coat/unthrifty

Losing a lot of fur

Treatment Sheet Needed?

Yes ☐ No ☒

Date Completed \_\_\_\_\_

Date	Time	Notes	Initials
9/12/16	9AM	<p>Examined Thumper this morning. [REDACTED] reported that Thumper is eating well, defecating normally, has not had weight loss or ambulation issues. Thumper is 8.5 years old.</p> <p>O: Weight appears steady, consistent with his regular body weight. Thumper is bright, alert, responsive and hydrated. No lameness or reluctance to hop. He is a personable and social rabbit. No obvious lesions or masses on physical exam. Hind feet appear furred. Did not do oral exam as he often resists. He is losing a large amount of fur, especially in comparison to all the other rabbits including Peter, who is the same age. He has some spots which appear slightly thin but no obvious alopecia.</p> <p>A: DDX; open. Suspect related to seasonal fur loss and is having a very heavy shed. Or potentially he is having issues grooming- Although the coat is very clean. Differentials; open.</p> <p>P: Since Thumper has not had weight loss, behavioral changes or ambulation issues, and appears to be eating well and defecating normally, recommend;</p> <ol style="list-style-type: none"> <li>1. Increase brushing and remove all hair that is shed from cage so he doesn't eat it all.</li> <li>2. Increase hay offered. Since all rabbits get one handful hay/day, recommend to increase hay for all rabbits.</li> <li>3. Plan for all rabbits; Offer 1 handful hay twice a day for 1 week. During the weekend, give 2 handfuls in the morning.               <ol style="list-style-type: none"> <li>a. Next week (week of Sept 19); offer 2 handful hay in morning and 1 handful afternoon for a week. During weekend, give 3 handfuls in the morning</li> </ol> </li> </ol>	<p><i>[Signature]</i></p> <p><i>Closed</i></p> <p><i>2/13/17</i></p> <p><i>SD</i></p>

Rev 10-22-09

DMK

BAR = Bright, Alert, Responsive

TAO = Topical Antibiotic Ointment

SID = Once daily; BID = Twice daily; TID = Three times daily

CTM = Continue monitoring

ATTACH ANY TREATMENT SHEETS TO RECORD AFTER CLOSURE

		<p>b. 3<sup>rd</sup> week (week of Sept 26) offer 2 handfuls of hay morning and afternoon. During weekend, give 3 handfuls in the morning. Continue this plan.</p> <p>c. We may need more hay.</p> <p>4. For Thumper- recheck 1 week or earlier. This was a good catch by Al. Hopefully Thumper is just having a very heavy shed.</p>	
9/16/16	9AM	BARTH, eating well, weight stable Monitor. Heavy shed.	sg
9-28-16	8:05A	Animal is alert + active. Rabbit is losing weight but eating hay + feed. Hair coat looks good. CTM very closely.
